## 1. Introduction

This document is the Information Security Management System 'ISMS' of Acaboom Limited and for the purpose of this ISMS will be referred to as 'Acaboom'.

The ISMS is the property of Acaboom and is a controlled document.

The purpose of the ISMS is to provide an overview of Acaboom, the activities it carries out and the ISMS standards of operation it conforms to.

It is not designed to act as a procedures manual, although it does carry information about where procedures information is located and the detailed information on documentation requirements for the procedures required by the respective standards.

### 1.1 The Issue Status

The issue status is indicated by the version number in the footer of this document. It identifies the issue status of this ISMS.

The ISMS can be fully revised and re-issued at the discretion of the Management Team.

Please note that this ISMS is only valid on day of printing.

## 1.2 ISMS Policy

In pursuit of its primary objectives, it is the policy of Acaboom to maintain an Information Management System which follows similar principles to those required for ISO 27001 accreditation. (For the avoidance of doubt Acaboom is not, nor seeking, ISO 27001 accreditation.)

It is the policy of Acaboom to:

- make the details of its policy known to all other interested parties.
- comply with all legal requirements, codes of practice and all other requirements applicable to its activities.
- provide all the resources of equipment, trained and competent staff, and any other requirements to enable these objectives to be met.
- ensure that all employees are made aware of their individual obligations in respect of this Information Security Policy.
- maintain a management system that will achieve these objectives and seek continual improvement in the effectiveness and performance of our management system based on "risk".

This Information Security Policy provides a framework for setting, monitoring, reviewing and achieving Acaboom's objectives, programmes and targets.

To ensure the company maintains its awareness for continuous improvement, the Information Security Management System is regularly reviewed by "Top Management" to ensure it remains appropriate and suitable to the Acaboom business.

### **Scope of the Policy**

The scope of this policy relates to use of the database and computer systems operated by the company in pursuit of the company's business of providing software services. It also relates where appropriate to external risk sources including functions which are outsourced.

## **2. Overview of the Organisation**

Acaboom Limited was established in 2013 to provide software services enabling customers to deliver bespoke marketing presentations and proposals to end clients. The company primarily deals with customers within the estate agency sector, although the service may be sold to customers of other sectors in the future.

### **2.1 Scope of Registration**

Provision of Information Technology and Software Services specialising in the UK estate agency sector.

### 3. Objectives

Acaboom aims to provide a professional and ethical service to its clients. In order to demonstrate its intentions, the Management Team will analyse customer feedback data, internal performance data, financial performance data and business performance data to ensure that its Objectives are being met.

#### **INFORMATION SECURITY**

The Objectives are set out in within the Information Security Management System are disseminated to each department for incorporation into their management roles and shared with team members.

Each department is responsible for delivering its objectives and this is monitored via individual, appraisals and team meetings.

Acaboom's Objectives are as follows:

- Objective 1: Existing services – To continue to deliver its services within a secure environment.
- Objective 2: Development – To conduct risk assessments to ensure that risk to information in the care of Acaboom is minimized or eliminated.
- Objective 3: Innovation – To continue to innovate and enhance the service provided to make the ISMS more effective.
- Objective 4: Participation – To continue to liaise with all interested parties to improve the ISMS.
- Objective 5: Skills – To continue to increase the level of professional skills of our staff and key sub-contractors in terms of Information Security Management.
- Objective 6: Profit – To work to ensure the ISMS helps the company to become more efficient and profitable.

Whilst the above company objectives are “high-level”, we have further analysed and categorised these into our Risk & Opportunities Matrix. In some cases, this may allow for specific objectives being set across different functions. This shows how we measure and set targets in meeting the “high level” objectives.

## 4. Context of the organisation

### 4.1 Understanding the organisation and its context

The context of the organisation is demonstrated within this Information Security Management System and all associated processes connected with the services/products offered.

The legal legislation/regulatory compliance to the service / products offered are listed in the CROO document.

The Managing Director reviews changes to any relevant legislation and the company uses the services of specialist parties to advise the company in respect of IT security generally.

### 4.2 Understanding the needs and expectation of interested parties

Interested Parties	Information Requirements
Directors	<p>Ensure that the business continues to function in a profitable manner without hindrance and bureaucracy.</p> <p>To ensure business information is kept confidential, available and reliable.</p>

Employees	<p>To protect client confidentiality.</p> <p>To ensure employment processes are followed.</p> <p>To ensure Information Security Policies and Procedures are followed.</p> <p>To take responsibility for their own training</p>
Clients	<p>To ensure all related information is kept confidential.</p> <p>Meet the requirements of the Data Protection Act 1998.</p> <p>To ensure integrity of the systems are maintained as appropriate.</p> <p>To ensure adherence to relevant SLAs.</p>
Contractors	<p>To ensure all related information is kept confidential.</p> <p>Meet the requirements of the Data Protection Act 1998.</p> <p>To ensure integrity of the systems are maintained as appropriate.</p> <p>To ensure adherence to relevant SLAs/NDAs.</p>

Suppliers	<p>To ensure all related information is kept confidential.</p> <p>Meet the requirements of the Data Protection Act 1998.</p> <p>To ensure integrity of the systems are maintained as appropriate.</p> <p>To ensure adherence to relevant SLAs.</p>
Accountants	<p>To ensure all related information is kept confidential.</p> <p>Meet the requirements of the Data Protection Act 1998.</p>
Company Solicitors / Lawyers	<p>To ensure all related information is kept confidential.</p> <p>Meet the requirements of the Data Protection Act 1998.</p>
Governing Bodies	<p>Provision of up to date information.</p> <p>Provision of relevant information.</p> <p>Provision of guidance where needed.</p> <p>To ensure all related information is kept confidential.</p> <p>Meet the requirements of the Data Protection Act 1998.</p>

### 4.3 Determining the scope of the Information Security System

Information Security Acaboom:

The scope of the system covers all the core and supporting activities of the company. The activities and arrangements of all personnel including any sub-contractors also fall within the scope of the system.

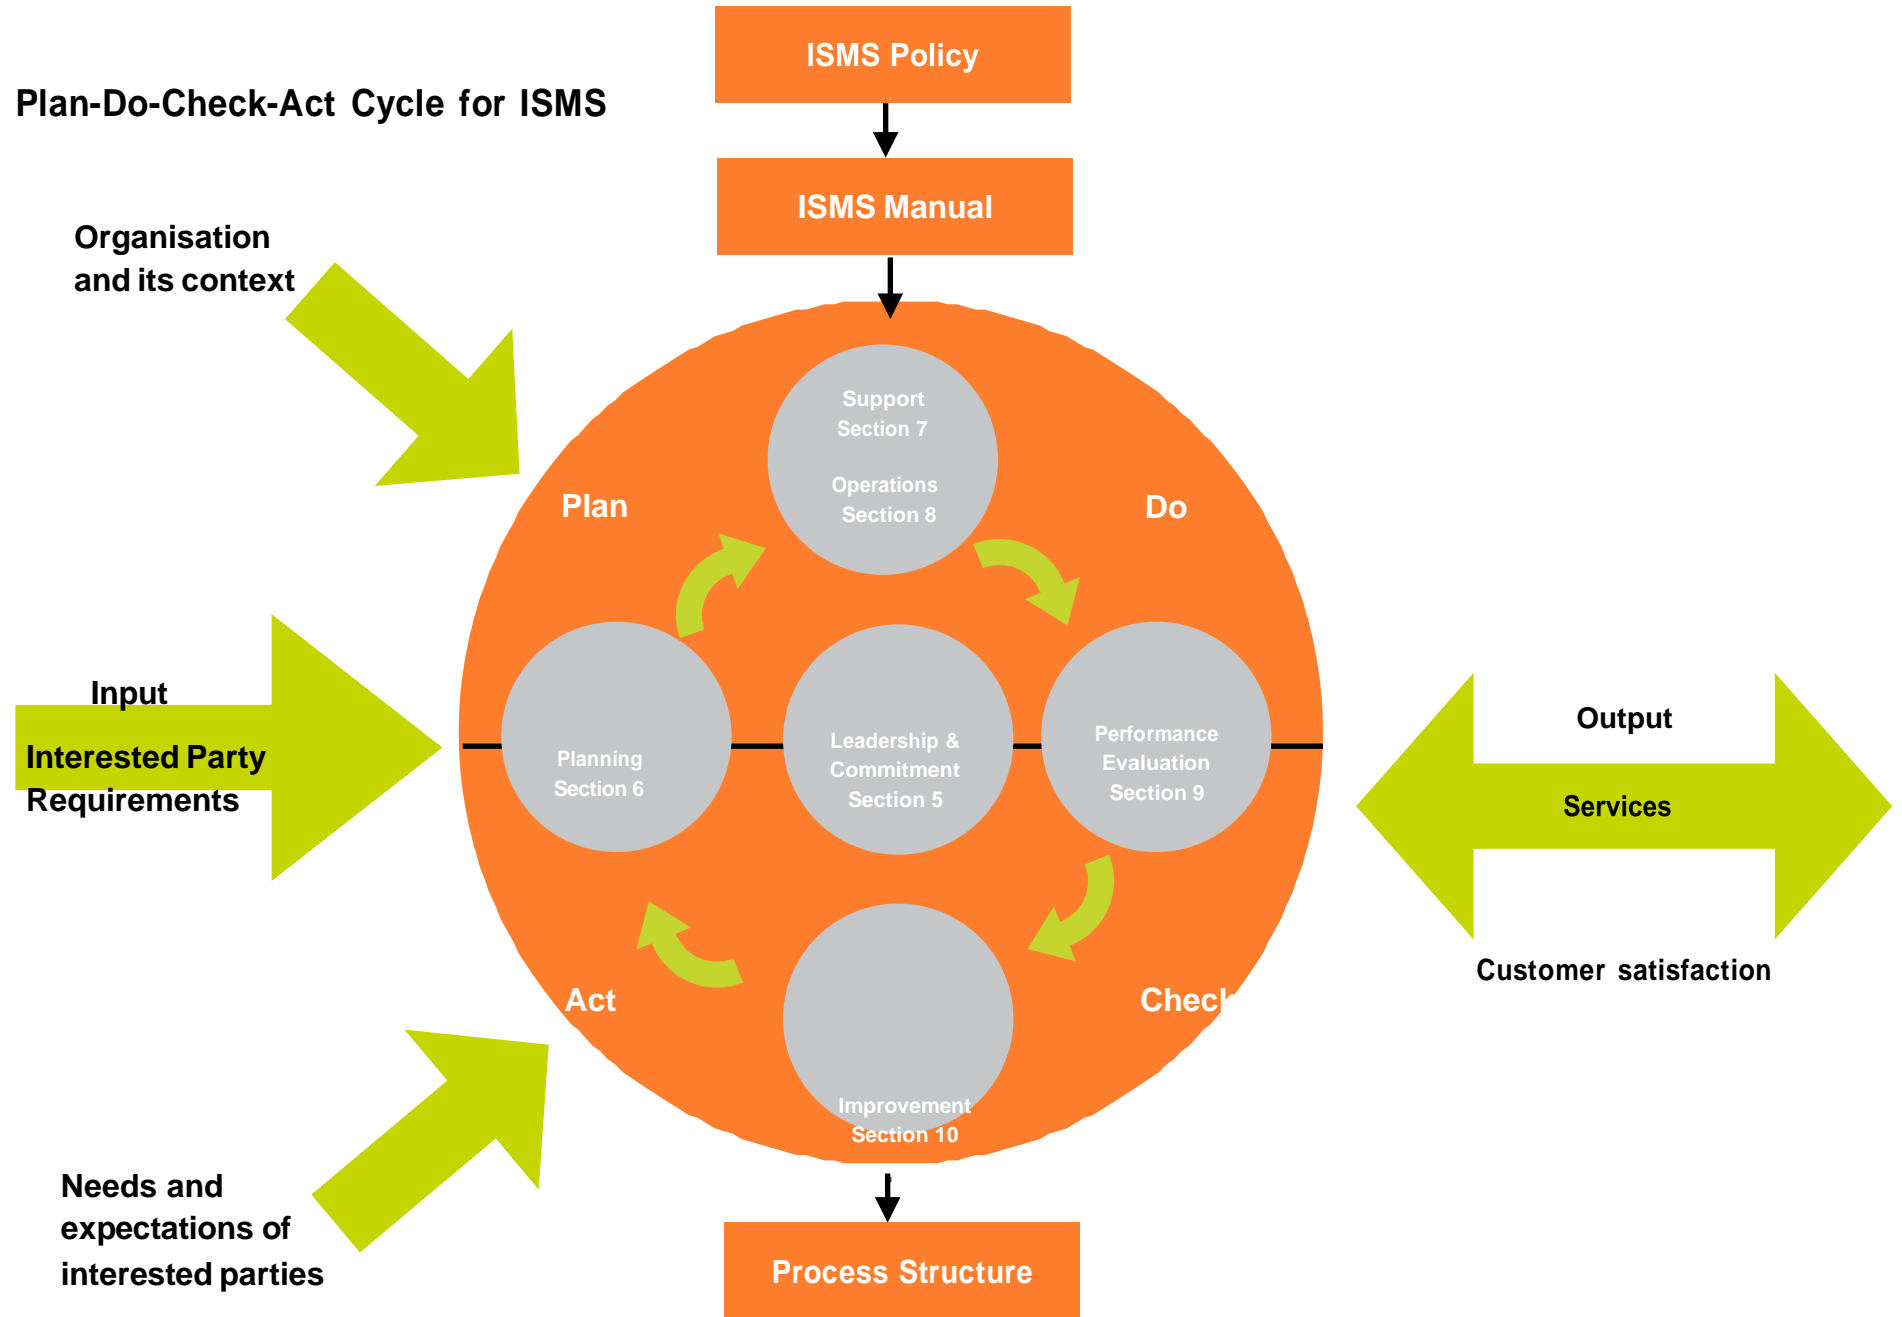

### 4.4 Information Security Management system

The organisation has established, implemented, maintained and will continually improve an Information Security Management System.

This ISMS provides information as to how the company aims to meet these requirements, with reference to key processes and policies as appropriate.

#### 4.4 Plan-Do-Check-Act Cycle for ISMS

## 5 Leadership

### 5.1 Leadership & Commitment

The designated Senior Management Representative(s) will ensure that staff are aware of the importance of meeting customer, as well as statutory and regulatory requirement, so as to contribute to achieving the company's Information Security Management System requirements which are aligned with the organisations strategic direction

The Senior Management Team is responsible for implementing this system and ensuring the system is understood and complied with at all levels of the organisation.

In summary, the Senior Management Team will ensure that:

- The company has a designated Senior Management Representative who is responsible for the maintenance and review of the Management System.
- The ongoing activities of the company are reviewed regularly, and any required corrective action is adequately implemented and reviewed to establish an effective preventative process.
- Measurement of the company's performance against its declared Information Security Objectives is undertaken.

- Resources needed for the system are available and employees have the necessary training, skills and equipment to effectively carry out their work.
- Internal audits are conducted regularly to review progress and assist in the improvement of processes and procedures.
- Objectives are reviewed and, if necessary amended, at regular Management Review meetings and the performance communicated to all staff.
- The Information Security Management System is established inline with the strategic direction of the organisation and that intended outcome(s) are achieved.
- The Information Security Management System is integrated into the organisations business processes.
- Communication covering the importance of adhering to an effective Information Security Management System is in place.
- Continual improvement to the Information Security Management System is promoted and encouraged to further enhance its effectiveness.

- The contribution of persons involved in the effectiveness of the Information Security Management System is achieved by engaging, directing and supporting persons and other management roles within their area of responsibility.

## **5.2 Policy**

The ISMS Policy of Acaboom is located within section 1.2 of this ISMS.

## **5.3 Organisational roles, responsibilities and authorities**

Acaboom has an organisation chart in place, employee contracts together with job descriptions to ensure that the appropriate personnel are in place to cover the whole context of the organisation and strategy of the business.

The Managing Director is responsible for randomly sampling records to ensure that all required data has been captured, and that data is accurate and complete.

### 5.3 Organisational Chart

## 6 Planning

### 6.1 Actions to address risks and opportunities

We have identified the risks and opportunities that are relevant to our Information Security Management System from an operational perspective. This also links to section 4.1 and 4.2 of this ISMS and provides information on low-level objectives. This 'Context, Risk, Opportunities and Objectives' (CROO) document is separate to this ISMS. Within each of the areas the risks are identified together with a rating as to the importance of the risk. The associated consequence & mitigation of the risk is also noted together with any new opportunities that we have identified. Where applicable, we have identified measurable objectives and these can be found within a separate tab in the 'CROO' document.

The controls identified in this document feed into our risk treatment plan (Statement of Applicability).

#### 6.1.2 Information Security Risk Assessment

In accordance with our 'CROO' matrix referenced in 6.1, above, we have assessed any typical / likely Information Security threats based on

their potential effects on Confidentiality, Integrity and Availability (CIA) attributes.

Following this analysis, appropriate controls have been identified, which feed into our Statement of Applicability, as described in section 6.1.3, below.

#### 6.1.3 Information Security Risk Treatment

The approach to our risk treatment plan has been designed and implemented using the main headings within the standard (Annex A, Table A.1 – Control objectives and controls) as a guide to establish that all controls required have been considered and that there are no omissions.

The document identifies controls to mitigate risks following the process of identification, analysis and evaluation described in section 7 and is directly linked to the aspects of the organisation.

Please see below documents as demonstration of compliance of this clause:-

- CROO Document (Context, Risk, Opportunities & Objectives)
- Statement of Applicability

## **6.2 Information Security Objectives and planning to achieve them**

The ISMS Objectives and methods of achieving the objectives is located within section 3 of this ISMS.

## **7 Support**

### **7.1 Resources**

Acaboom determines and provides the resources needed for the establishment, implementation, maintenance and continual improvement of the management system.

We ensure that the below elements are taken into account when completing an evaluation:

- The capabilities of, and constraints on, existing internal resources.
- What needs to be obtained from external providers.

### **7.2 Competence**

All employees have the training and skills needed to meet their job requirements. All employees are monitored on an ongoing basis to identify any training and development needs. Competences and training needs are identified / satisfied by using:

- Job descriptions which set out the competences required.
- Contracts of employment which set out contractual and legal requirements.
- Induction checklists to ensure / check understanding.
- Development plans to set objectives.
- On the job reviews.

### **7.3 Awareness**

We ensure that all employees are aware of all policies and their contribution to the effectiveness of the Management System through:

- Virtual notice boards (e.g Slack)
- Team meetings
- Awareness training
- Induction

### **7.4 Communication**

For internal staff the HR software is a source of information and is updated regularly to ensure that all information is correct. This is accessible by all staff and relevant contractors.

Client mail shots are sent out regularly to provide additional services etc

### **7.5 Documented Information**

#### **7.5.1 General**

Acaboom demonstrates documented compliance through this ISMS (which includes processes & procedures) on an electronic system which is available on the company HR system to all employees and relevant contractors. All information is read only and only accessible via the document owner for amendment.

## **7.5.2 Creating and updating**

The creation of documentation to support the Information Security Management System is primarily the responsibility of the designated "Top Management Representative".

Identification will be sought by a document number, date and author. To aid the approval and suitability of documents, the Managing Director authorises the release and delegates any training required to the "Top Management Team".

## **7.5.3 Control of documented information**

All documentation is controlled by version and date and is listed on a "Master Document List".

Control of documents can be seen on the Master Document List and encompasses the following elements:-

- Distribution, Access, Retrieval and use.
- Storage and preservation, including preservation of legibility.
- Control of changes (e.g. version control).
- Retention and disposition.

Documents can be retrieved by authorised personnel from the storage locations specified and/or from folders held within Asana. Customer records are identified by customer name.

On or after the retention period stated, the relevant records will be reviewed by Top Management and will either remain in-situ, be archived or destroyed.

If records are to be destroyed, they will be disposed of in a controlled manner; sensitive hard copies will be shredded and soft copies will be deleted from the system. If records are to be archived, they will be identified and stored appropriately.

## **8 Operation**

### **8.1 Operational planning and control**

Acaboom has determined the requirements and controls implemented for all processes needed to meet Information Security requirements and has implemented the actions described in section 6.1 of this ISMS. We will also implement plans to achieve ISMS objectives, as highlighted in sections 3 and 6.2 of this ISMS. We retain documented information to the extent necessary to have confidence that the processes have been carried out as planned. We shall control any planned changes and will review the consequences of unintended changes, taking action to mitigate any adverse effects.

### **8.2 Information Security risk assessment**

In line with the criteria established in section 6.1.2 of this ISMS, we perform ISMS risk assessments at planned intervals or when significant changes are proposed or occur. Documented information of the results of risk assessments is retained.

### **8.3 Information Security risk treatment**

The risk treatment is incorporated within Risks & Opportunities – See Clause 6.1

## **9 Performance evaluation**

### **9.1 Monitoring, measurement, analysis and evaluation**

Monitoring is based on risk and is linked to the risk & opportunities register together with the risk assessments which are carried out. This is also monitored through internal audits (section 9.2) and management review (section 9.3) to ensure the effectiveness of the management system.

### **9.2 Internal Audit**

Internal audits are carried out through “risk or clause based” auditing.

Appropriate personnel are allocated to complete the internal audits and must record appropriate evidence for completeness. All audits completed must be authorised by Top Management as complete once any non-conforming areas have been dealt with (without any undue delay).

### **9.3 Management review**

Management reviews take place as a minimum on an annual basis. The attendees present are “Top Management” and any other appropriate persons of the business.

All inputs / outputs are full documented. Any actions arising from the meeting must be completed without any undue delay and appropriate evidence filed with the Management review documentation.

## 10 Improvement

### 10.1 Nonconformity and corrective action

Should a nonconformity occur, including those arising from complaints, internal audits & external 3<sup>rd</sup> part assessment Acaboom designate the appropriate “Top Management” representative to ensure that corrective action including root cause analysis is completed and implemented to avoid any further occurrences. This is then analysed and should the risk to the business pose to be “high” then this is then entered onto the “CROO document” (See Clause 6.1) to assist in mitigating the risk to the business.

Should any non-conformances occur or be identified then an internal audit report / non-conformance report must be completed to ensure that a full analysis of the problem is resolved. A summary of all actions will be maintained within the Management Action Log (CAPA LOG).

The corrective action plan summary must be completed, as this then forms part of the Management Review meeting.

### 10.2 Continual Improvement

Continual Improvement will be ongoing through various elements of the Business Management System which is encompassed within this document. The list below is not exhaustive: -

- CROO Document – Evaluated at several stages (clause 5.1, 6.1)
- ISMS Policy / Objectives
- Competency
- Matrix Customer Satisfaction
- Internal Audits
- Management Review
